

Job Description:

Position: Intern- Software Development

Meesho is India's largest marketplace for long tail products. Our vision is to enable 100 million small businesses in India to succeed online. The Meesho marketplace provides small businesses, which includes SMBs, MSMEs and individual entrepreneurs, access to millions of customers, selection from over 100+ categories, pan-India logistics, payment services, and customer support capabilities to efficiently run their businesses on the Meesho ecosystem.

Our Story

Meesho was started by Vidit Aatrey and Sanjeev Barnwal with the idea to enable mom & pop stores to sell online in 2016. They soon realised that their primary users were actually sellers who did not own a shop, but sold through their social network. They realised that this is how small businesses will work in the future and built a product to democratise social commerce and enable literally anyone to start their own venture. They quickly pivoted to enabling social sellers/entrepreneurs monetise their network by providing supply, logistics and payments infrastructure. From its humble beginnings six year ago, Meesho has successfully enabled over 15M+ individual entrepreneurs to start their own online businesses with zero investment, bringing e-commerce to more than 45M+ customers across India. Till date the company has delivered orders from 100K+ registered suppliers to over 26,000 pin codes in more than 4,800 cities, generating over INR 500 crore in income for individual entrepreneurs and serving customers in more than 4,500 Tier 2+ cities — truly bringing e-commerce to Bharat. Meesho is Series E funded and has raised \$300 Million in a fresh round of investment in 2021 led by SoftBank Vision Fund 2, the world's largest technology-focused venture capital fund. The funding round also saw participation from existing investors such as Prosus Ventures, Facebook, Shunwei Capital, Venture Highway and Knollwood Investment. The latest round of investment means that Meesho's valuation is now at USD 2.1 billion — taking it to unicorn status. Meesho is headquartered in Bengaluru, India and was one three Indian companies to be selected for YCombinator in 2016. We were in the first batch of Google Launchpad - Solve for India programme. In 2018 and 2019 (for two consecutive years), Meesho was named by LinkedIn as LinkedIn India's Top 25 Startups - 2019 Meesho has also been featured on Y Combinator's Top Companies List 2019 and 2021. We are the only Indian startup to make it to Fast Company's 50 Most Innovative Companies in 2020 and were declared as The Young Turks Startup of the Year at The India Business Leaders Awards 2020 by CNBC TV-18. Our CEO and Co Founder Vidit Aatrey has been featured in The Economic Times' 40 Under 40 list of

India's Hottest Young Business Leaders 2020. And recently, Vidit and Sanjeev have made it to Fortune India's 40 Under 40 list of entrepreneurs.
